Explore the latest U.S. solar policy changes in Sept 2025, from ITC rules to tariffs and state programs. See how they impact solar developers and ...

Several legislative extensions have kept the ITC in place over the past two decades. However, the 2025 passage of the One Big Beautiful Bill Act (OBBBA) rapidly phases out the ITC for solar.

More than three-quarters of solar capacity installed in 2025 has been in states won by Trump, such as Texas, Indiana, and Florida.

On this page you'll find resources to learn what solar energy is; how you, your business, or your community can go solar; ...

In 2025, a growing number of jurisdictions mandate or incentivize the inclusion of solar photovoltaic (PV) systems in new ...

State and local policies and regulations have encouraged greater solar PV deployment in their jurisdictions. Examples include financial incentives (e.g., tax ...

EIA projects that PV's growth in 2023 (27 GWac) and 2024 (36 GWac) will continue in 2025 (39 GWac) and remain at similar levels in 2026 (36 GWac). In 2024, 24 states and territories ...

Global Manufacturing The United States manufactured approximately 15.7 GWdc of PV panels in H1 2025, up 126%, y/y, and 440% over the past two years. In Q3 and early Q4 2025, domestic ...

This page describes the patchwork of federal, state, and local policies and regulations pertaining to renewable energy systems that impact ...
