Our PV modules are designed with better technology in mind, made from robust product components, under stringent quality control steps and high-tech manufacturing processes.

With 550W of power and 24V energy generation, the MEGA 550 can generate renewable energy and reduce electricity bills for any residential, agricultural, or ...

The specifications and characteristics contained in this datasheet may deviate slightly from our actual products due to the product developments and uncertainty of measurement devices. The ...

When it comes to selecting the right solar panel, understanding its specifications becomes essential to ensure optimal performance and efficiency. This article aims to provide a comprehensive ...

Detailed profile including pictures, certification details and manufacturer PDF.

Based on the 210mm large-size silicon wafer and monocrystalline PERC cell, power output can exceed 550W.

All specifications are in accordance with standard EN 50380. Color differences of the modules relative to the figures as well as discolorations of/in the modules which do not impair their proper functioning are ...

The document provides specifications for three photovoltaic modules: UL-540M-144HV, UL-545M-144HV, and UL-550M-144HV, listing their power, size, weight, ...

Better light trapping and current collection to improve module power output and reliability. Excellent Anti-PID performance guarantee via optimized mass-production process and materials control. Module ...

Find the exact solar panel size & weight in our 2025 guide. Our complete chart compares models by ft/cm and lbs/kg to help you plan your ...
