OverviewDesignHistoryTraffic calculationsTypes of hoist mechanismsControls Special operating modesModernizationSome people argue that elevators began as simple rope or chain hoists (see Traction elevators below). An elevator is essentially a platform that is either pulled or pushed up by mechanical means. A modern-day elevator consists of a cab (also called a "cabin", "cage", "carriage", "coach", or "car",) mounted on a platform within an enclosed space called a shaft or sometimes a "hoistway". In the past, elevator drive mechanisms we...
