Leverage your Unistellar telescope's power and join our community to observe intriguing astronomical events such as supernovae and exoplanet transits, while ...

A groundbreaking study, co-authored by researchers like Ravi Kopparapu and Jacob Haqq-Misra, delves into the fascinating possibility that NASA's next-generation space telescope, the Habitable ...

These purposes include: Security, moderation, anti-cheat, and anti-fraud activities. We may share some of the information we collect to help ...

Solar arrays are critical components of spacecraft power systems, providing the energy needed for propulsion, communications, and mission ...

Scientists from NASA have published the results of a study on the possibility of detecting arrays of solar panels created by an advanced ...

Given their reflective properties, vast arrays of these solar panels would be distinguishable and potentially detectable by advanced observers like NASA, who are tirelessly ...

OverviewDesign and constructionHistoryObjectivesLaunch and trajectoryPublic outreachSee alsoFurther readingEuropa Clipper is a NASA Planetary Science Division mission, designated a Large Strategic Science Mission, and funded under the Planetary Missions Program Office's Solar System Exploration program as its second flight. It is also supported by the new Ocean Worlds Exploration Program. The spacecraft bus is a 5-meter-long combination of a 150-cm-wide aluminum cylindri...

NASA researched if future space telescopes could detect the use of widespread solar panels by alien civilizations in our galaxy.
