---

The archipelago of Cape Verde is a developing state in West Africa with extreme external energy dependency on refined oil imports despite their available solar and wind resources.

It is a project with 20 megawatts (MW) of power and 160 megawatts per hour (MWh) of energy storage capacity.

The Santiago Pumped Storage Project, which will be located in Ch&#227; Gon&#231;alves, in the municipality of Ribeira Grande de Santiago and will cost around 60 million euros, promises to significantly increase ...

Madagascar container energy storage transformation Madagascar, an island known for lemurs and vanilla, is quietly becoming a trailblazer in container energy storage products. With its growing ...

Cape Verde is moving toward a cleaner energy future by expanding its wind capacity by 13.5 megawatts and adding 26 megawatt-hours of grid-connected battery storage.

The project, considered the world's largest solar-storage project, will install 3.5GW of solar photovoltaic capacity and a 4.5GWh battery storage system. The project has commenced in November 2024. [pdf]

With the P500E, you can transfer energy bi-directionally to the battery, grid and DG, helping you to achieve more functionality and maximise the benefits of your energy storage system.
