Almost three-quarters of all solar and wind power projects being built globally are in China, says a new report that highlights the country's rapid ...

However, China still needs to turn the massive renewables buildup into power generation, replace fossil fuels, and reach the "tipping point" so as to ...

An aerial view of the construction site of a 1-million-kilowatt solar-thermal energy-generation and storage project in Hainan Tibetan Autonomous ...

Construction is in full swing to build a 200,000-kilowatt concentrated solar power (CSP) generation system in Delingha City, northwest China's Qinghai Province. Local officials said the city ...

China aims to peak carbon emissions by 2030 and reach carbon neutrality by 2060. To support these goals, the government committed to ...

China's largest single solar power project built on former coal mining subsidence land has begun operation in Lingwu, Ningxia Hui Autonomous Region. The 4-gigawatt photovoltaic plant ...

A solar power project in the Gobi Desert has moved the needle on the size and scope of global photovoltaic installations, aided by innovation in ...

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to harness the region's ...

Explore China's massive solar megaprojects. Learn how gigawatt-scale photovoltaic farms in remote regions are reshaping the global energy landscape.

China Construction Solar Power Generation Project

Planned solar capacity projects will likely lead to continued growth in China's solar capacity. More than 720 GW of solar capacity are in development: about 250 GW under ...
