Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, ...

Nuclear power accounts for roughly 60% of Ontario's power generation, and represents the baseload of its power supply. The government plans to maintain nuclear power's role in energy generation through to 2025. Ontario currently has 18 nuclear units in operation. These reactors amount to 11,400 MW of generation capacity and are located at three sites. The stations were constructed by the provincial Crown corporation, Ontario Hydro. In April 1999 Ontario Hydro was split into five component Crown corporatio...
