In a first-of-its-kind pilot initiated in 2022, Microsoft partnered with Saft, the battery subsidiary of TotalEnergies, to deploy four independent ...

Whether you need edge computing in remote locations or scalable data capacity in metro areas--our modular systems are ready to adapt. Try our selection tool to find the right fit for your needs.

DC Container (BESS) is designed with long-life battery cells and robust electrical components, ensuring safe and stable operation even in harsh environments. It ...

FlexGen provides turnkey and hardware-agnostic solutions for designing, integrating, and operating energy storage assets to address the top four ...

As data center energy consumption continues to increase, various options are being considered that could improve the efficiency of existing data centers. Powering data centers with DC power instead ...

Following the growing applications for edge computing, Delta is introducing a new generation of Containerized Data Center Solutions with flexible power and ...

SSTs convert 10kV AC to 800V DC directly--boosting efficiency, reducing copper, and supporting EVs, solar, and storage in next-gen data centers.

The HSC has a high power density (or C-rate*), meaning it can be recharged in a much shorter time frame, making it ideal to ...

By integrating large-scale battery storage systems with container data centers, these companies help reduce reliance on fossil fuels. Battery energy storage systems play a crucial role in ...

DC power storage containers for data centers

At Stulz, we deliver advanced container data center solutions that integrate cutting-edge cooling technologies, precision climate control, and robust security ...
