The JA Solar JAM54D40 LB modules from the DeepBlue 4.0 series deliver ...

Better light trapping with multi busbar decreasing resistance and power loss. SMBB Technology. Better resistant to harsh environments - salt, ammonia, high humidity and temperature. Doubleglass ...

Excellent product appearance and performance Two-sided double-glazed modules, symmetrical structural design, low risk of hidden cracks.

The new i-TOPCon double glass PV modules integrate these N-type bifacial i-TOPCon cells with over 80% bifaciality, multi-busbar (MBB) design, full ...

Significant amount of near infrared light passes through bifacial cells. Double-glass structure shows a loss of ~ 1.30% compare to the glass/backsheet structure under STC measurements.

Raye Energy's bifacial double glass solar panels are equipped with advanced 9BB (9 Busbar) solar cells, which enhance energy efficiency and improve overall ...

Talesun BIPRO 590W Bifacial Dual Glass Solar Panel - TM7G72M-590 is a high-performance N-type bifacial module engineered for residential, commercial, and utility-scale photovoltaic installations. ...

Modules have no on/off switch. Modules can be rendered inoperative only by removing them from sunlight, or by fully covering their front surface with cloth, cardboard, or other completely opaque ...

MBB, or Multi-Busbar technology, uses multiple thin wires in half-cut solar panels to boost efficiency, reduce losses, and enhance durability.

Our PV modules are designed with better technology in mind, made from robust product components, under stringent quality control steps and high-tech manufacturing processes.
