China has the largest grid-scale flywheel energy storage plant in the world with 30 MW capacity. The system was connected to the grid in 2024 and it was the first such system in China.

Power your home or business with EK Solar Energy's Energy Storage Inverters. Our solutions ensure efficient energy storage and sustainable power for a greener future.

The solution adopts new energy (wind and diesel energy storage) technology to provide a reliable guarantee for the stable operation of communication base stations.

Engineered specifically for large-scale energy storage endeavors, this container is built to handle substantial electrical loads. It serves as a reliable power reservoir for a diverse range of industrial ...

It can meet the company's application needs such as peak shaving, dynamic capacity expansion, demand-side response, and virtual power plants, and promote efficient energy utilization.

Discover how EK SOLAR's advanced photovoltaic inverters optimize solar energy conversion for residential, commercial, and industrial applications. Explore their efficiency, reliability, and integration ...

This energy storage inverter works with multiple battery models to provide up to 10kW of backup power for your entire house. The inverter also features a 90A AC pass-through, allowing you to connect to ...

We offer energy storage solutions, including battery modules, portable power supplies, and systems for residential, commercial, industrial, and utility-scale ...

Choose EK Solar Energy to experience efficient and intelligent home energy storage systems that provide reliable energy storage and energy-saving solutions for your home.
