Originally estimated to cost \$1.702m (\$877m), the Acajutla LNG power project represents the biggest energy infrastructure investment in the history of El Salvador.

The El Salvador energy storage battery processing plant is strategically situated in the Acajutla Industrial Zone, a hub for renewable energy projects near the country's largest seaport.

AES" Meanguera del Golfo solar plant--the first of its kind in Latin America--relies on enhanced solar-plus-battery storage technology to deliver uninterrupted, carbon-free electricity to isolated island ...

Despite the enormous challenges, including supply-chain disruptions, travel restrictions, airport closures, global financial volatility, and Salvadoran COVID-19 mitigation measures and regulations, the power ...

In addition to introducing the first LNG-fueled power plant to El Salvador, this project includes the first FSRU for the region. Regulations needed ...

BW Tatiana is the first-ever Floating Storage and Regasification Unit (FSRU) deployed in El Salvador, with a capacity of 280 MMSCFD and storage capacity ...

In recent years, the government of El Salvador has worked to diversify the energy matrix and be able to produce increasingly cleaner energy. The installed capacity by type of resource is presented below.

It represents all the energy required to supply end users in the country. Some of these energy sources are used directly while most are transformed into fuels or electricity for final consumption.
