## Electric grid baghdad

entered Iraq for the first time in 1917 where the first electric machine was installed in &quot;Khan Dala&quot; building. Prior to the Gulf War, the total installed generating capacity was 5,100 MW, which fell to about 2,300 MW after the Gulf War. Approximately 87% of the population had access to electricity. A combination of wars, sanctions, looting and vandalism has however, severely affected the entire power system infrastrucur...
