Where Does Our Electricity Come from? How Much of Our Electricity Comes from Low-Carbon Sources? Carbon Intensity of Electricity Electricity Production by Source What sources make up our electricity mix? How much comes from coal, oil, and gas, and how much from nuclear, hydropower, solar, or wind? In the interactive charts shown here, we see the breakdown of the electricity mix by source. The stacked area chart shows electricity production in absolute terms, allowing you to see how these sources add u... See more on ourworldindata

With no large-scale means to store excess electrical energy, the stability of an electrical grid depends on generating stations" ability to alter their power output ...

Electric power, produced from central generating stations and distributed over an electrical transmission grid, is widely used in industrial, commercial, and consumer applications. A country's per capita electric power consumption correlates with its industrial development. Electric motors power manufacturing machinery and propel subways and railway trains. Electric lighting is the most important form of artificial light. Electrical energy is used directly in processes such as extraction of aluminum from its ores and i...
