The new project, located in the Lingang new area of the China (Shanghai) Pilot Free Trade Zone, is scheduled to break ground in the first ...

In this project, a battery storage system in electric cars is being simulated under a very basic model of energy transfers. (This is a very common system consisting ...

Ford will repurpose EV battery plants to build grid-scale energy storage, betting on data centers as EV incentives fade.

Tesla's energy storage plant in Shanghai's Lin-gang Special Area commenced operation on Feb 11, as the assembly line started the production of ...

With an initial annual production capacity of 10,000 units, or roughly 40 gigawatt-hours of energy storage, this Megafactory is set to significantly contribute to Tesla's global energy storage ...

Megapack is a utility-scale battery that provides reliable energy storage, to stabilize the grid and prevents outages. Find out more about Megapack.

U.S. car manufacturer Tesla has signed an agreement with Chinese partners to develop a grid-side energy storage station in Shanghai. The project will utilize Tesla's Megapack energy ...

In order to advance electric transportation, it is important to identify the significant characteristics, pros and cons, new scientific developments, potential barriers, and imminent ...

Form Energy is nearly ready to go public and scale up with its 100-hour battery storage systems.

Our integrated approach drives research and development across battery materials, cells, packs, and systems for vehicles, buildings, and grid infrastructure to maximize the potential of ...
