---

In the short-term, Member States need to begin immediately rolling out solar panels for rooftops while in parallel, putting together a clear road map ...

The report examines EU Member States (Bulgaria, France, Germany, Greece, Italy, Latvia, Lithuania, Portugal, Romania, Spain and Sweden) on their good and bad practices when it comes to facilitating ...

The newly enacted EU Solar Rooftop Standard, part of the Energy Performance of Buildings Directive (EPBD), is set to dramatically expand rooftop ...

Firstly, this study considers solar radiation conditions and the available rooftop area for PV installation, clarifying the spatial differences in ...

A preliminary analysis conducted by SolarPower Europe suggests that the EPBD could drive the installation of 150 to 200 GW of rooftop solar in ...

European EPCs are re-evaluating large-format solar panels. Panel size directly affects installation risk, system compatibility, and solar project ROI stability.

The European Union accelerates solar energy deployment through the EU Solar Rooftop Initiative, the revised Energy Performance of Buildings Directive and the revised Renewable Energy Directive.

While existing residential buildings can greatly benefit from adding a solar installation, the directive does not require solar installations on such buildings.

Die EU hat ihre Solarkapazität in den letzten drei Jahren verdoppelt. Wie staatliche Förderprogramme das möglich gemacht haben, welche Subventionen noch verfügbar sind und was ...
