---

The flywheel energy storage market stood at \$0.4 billion in 2026 and is projected to grow to \$0.87 billion by 2035, at a CAGR of 9.13%.

This report offers a comprehensive analysis of the flywheel energy storage market, encompassing market size and growth projections, detailed segment analysis, competitive landscape ...

High initial costs are a significant barrier, as the capital required for flywheel systems can range from \$1,500 to \$6,000 per kWh, making them less attractive ...

The Flywheel Energy Storage (FES) market offers significant opportunities in grid stabilization, renewable energy integration, and applications like regenerative braking in transport. ...

The flywheel energy storage market size crossed USD 1.3 billion in 2024 and is expected to register at a CAGR of 4.2% from 2025 to 2034, driven by rising ...

The Global Flywheel Energy Storage Motor Market is projected to grow at a CAGR of 9.3% from 2025 to 2035, driven by increasing demand for renewable energy solutions and the necessity for reliable ...

Flywheel energy storage faces competition from other energy storage technologies, such as lithium-ion batteries, which are currently more widely used in many applications due to their higher ...

This article breaks down pricing factors, compares costs with traditional solutions, and explores how sectors like renewable energy and transportation benefit from this technology.

The global Flywheel Energy Storage Motor market is projected to grow from US\$ million in 2024 to US\$ million by 2031, at a CAGR of % (2025-2031), driven by critical product segments and diverse ...
