Since its deployment in November 2020, 5G sites and antennas have multiplied all over the French territory and the transition to the new ...

The project supports the development of the French 5G mobile infrastructure enabling ultra-fast data transfer through this very high capacity network, and it is fully in line with the targets ...

Explore an in-depth analysis of 5G regulation and law in France, covering deployment, spectrum licensing, and future 6G initiatives. Discover ...

To prepare France for tomorrow's innovations, the Government has established a roadmap to facilitate the development and deployment of 5G, which includes the work programme for ...

This research paper provides an exhaustive analysis of green communication strategies in 5G and next-generation networks, covering energy-efficient technologies, resource management, renewable ...

The present document establishes the minimum RF characteristics and minimum performance requirements of NR and NB-IoT operation in NR in-band Base Station (BS).

Having deployed France's largest 5G network by number of base stations, Free is today announcing that it has become the country's first telco to offer 5G 3.5 GHz ...

The coverage area in which service is provided is divided into a mosaic of small geographical areas called 'cells', each served by a separate low power multichannel and antenna at a base station.

High device integration, site simplification, intelligence, and full-lifecycle environmental friendliness are the four major characteristics of green networks. In addition to these, eight technological directions ...

French 5G communication green base station

This technical report explores how network energy saving technologies that have emerged since the 4G era, such as carrier shutdown, channel shutdown, symbol shutdown etc., can be leveraged to ...
