Guyana's landmark Gas-to-Energy project reached a critical milestone with the arrival of a 30-MW backup battery energy storage system (BESS) at Georgetown's John Fernandes Wharf, ...

From flood-resistant battery racks to smart energy management software, Guyana's emergency power infrastructure is entering a new era. The right storage solutions don't just keep lights on - they keep ...

The Wales Gas-to-Energy (GtE) project contractor, LNDCH4 Guyana, has announced the arrival of the Backup Battery Storage System (BESS) which it says forms a critical part of the power ...

The project is widely viewed as transformational for Guyana, which currently relies heavily on imported HFO to meet its electricity needs. The switch to domestically sourced natural gas is ...

Instead of wrapping up, let's leave you with this: Guyana's storage project isn't just about electrons in a box. It's a blueprint for how small nations can punch above their weight in the climate ...

After a period of dedicated efforts, on January 27, 2025, the Wakenaam Diesel and BESS Storage Project was officially completed.

Spanning 13 acres, the advanced facility combines solar generation and energy storage to stabilize power supply on the Essequibo Coast. It captures excess solar energy during the day and ...

This article explores how local manufacturers are driving innovation, the applications of battery storage modules across industries, and why businesses should consider Guyana-made systems for cost ...

Guyana has unveiled a new 0.65 MW grid-forming solar project, paired with a 1,500 kWh battery energy storage system (BESS) and a 13.8 kV ...
