This highly transparent ARC shows great potentials in enhancing the stability of perovskite devices, applicable not only to underwater cells but also extendable to land-based photovoltaic devices.

Solarphire PV glass has mechanical and physical properties similar to other soda-lime float glass. PPG also can supply this product with anti-reflective, highly reflective and corrosion-retardant coatings to ...

As a DuraMAT project, WattGlass is conducting a fundamental investigation into the physical and chemical interactions that occur between environmental soils and anti-soiling (AS)/anti-reflective ...

Borosil Renewables is renowned for its eco-friendly and cutting-edge solar glass solutions. Our solar glass products meet stringent international standards and ...

Optimized material overcomes NIR transmittance and emissivity limitations of traditional low-e coatings. The study provides a universal methodology for material selection in energy-efficient ...

In this research, a 1H,1H,2H,2H-heptadecafluorodecyl acrylate (HFDA) anti-reflection coating (ARC) was introduced as a high-transparent ...

Optically anti-reflective and water-repellent glass is required for solar cell covers to improve power-generation efficiency due to transparency improvement and dirt removal.

Our product portfolio features tempered, ultra-clear solar glass solutions with anti-reflective coating that diminishes reflectivity and improves light transmission.

Customized ITO / FTO conductive glass plays a crucial role in scientific experiments, offering excellent conductivity, transparency, and stability. Ideal for photovoltaics, sensors, and analytical instruments.

Highly reflective highly transparent and anti-PID solar glass

Our extra clear solar glass offers superior solar energy transmittance and is stable under solar radiation. It also survives harsh environmental conditions and ...
