Discover how to build a self-sufficient off-grid shipping container cabin using solar, wind, and rainwater systems -- the perfect eco retreat for 2025.

We're converting two shipping containers into an off-grid home! Each unit includes solar power, battery storage, water & septic-ready setup, and modern finishes.

It's highly recommended to have your system designed or checked by a licensed electrician with experience in off-grid solar and metal buildings to avoid costly and dangerous mistakes.

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

We have cleverly combined solar panels, shipping containers, and homes to offer an eco-friendly, convenient, and affordable new living solution.

Protect yourself from blackouts with Enphase Solar and Storage. Our battery system utilizes safe, low voltage power to intelligently provide reliable battery ...

Founded by Robert Wagoner in 2015, Custom Container Living is dedicated to delivering exceptional, environmentally conscious homes. From solar power integration to innovative water ...
