Skilled project teams apply hydropower knowledge and field-proven expertise to formulate tailored solutions for dam (impoundment), run-of-river (diversion) and pumped storage plants.

We offer all power conversion and grid integration equipment for large hydropower plants, such as pumped storage, river and tidal applications, from planning and optimization to ...

We carry out electrical and plant construction for power plants and transformer stations on behalf of the customer. This includes, among other things, cabinet ...

To relieve the hydropower plants, this paper proposes a hybridization strategy where a hydropower unit is paired with an energy storage system (ESS) to increase operational flexibility and ...

Safe, remote, cost-effective operations with our integrated solutions including automation, electrical, excitation and turbine control as well as digital ...

We supply all electrical products for hydroelectric power plants with tools adapted to the constraints and needs of operators. Our control solutions guarantee ...

OHC enables hydro operators to seamlessly integrate and manage hydropower assets alongside other renewable and conventional energy ...

With an active presence on the five continents, Ingeteam is a leading company in the RE sector, offering robust, high reliability solutions for the automation and ...

With our comprehensive solution, you can harness the full potential of your hydro power plant, ensuring a sustainable and powerful energy source for generations ...

Hydropower Automation Energy Storage Equipment

With extensive experience in hydropower control strategies--such as water balance control, frequency support applications, and power plant fleet management--Valmet is well ...
