Lightweight solar modules bonded with high-performance adhesives from Innotec are a winning combination. Fast and simple installation. Compared to installing ...

Suitable for small contact applications (6mm x 6mm). Adhesion to a wide range of substrates including Kapton, tin, copper, aluminum, stainless steel, ITO and other metal substrates.

Together with you, we have developed cost-effective adhesive solutions for frame bonding, positioning and fixing solar cells, sealing edges and many other applications.

We have a wide variety of solar panel adhesives, from quick-curing adhesives for attaching the junction box to the PV panel to two-component aliphatic ...

No more messy hands, just perfect solar panels every time. Watch the magic of automated adhesive application in action! ...more

In this paper, we demonstrate a new and simple hydrogel cooling method that is inspired by marine mussels. We design an organic-inorganic hydrogel with all-weather adhesive and tunable ...

A: Bonding flexible solar PV panels or aluminium rails, for the installation of traditional glass faced to solar PV, avoids drilling holes in the roof and the risk of ...

Sika adhesive technologies empower photovoltaic, CSP and solar thermal providers with enhanced design options, cost reductions, and efficiency through material ...

This manual is intended to provide guidance on sealant choice and proper application procedures for DuPont™ Fortasun™, formerly Dow Corning® brand, sealants for photovoltaic (PV) framing and ...
