This vehicle immobilizer circuit is quite possibly the smallest, simplest, cheapest and easiest to make, install and operate. Thoroughly field tested, robust and weather resistant design of ...

Sadly, the days of inexpensive PCBs from China are over for US citizens - you all know why so we need not discuss that. The prices from China still beat the prices from US sources in most ...

Using the circuit presented here, you can construct a very inexpensive AGC amplifier with the following features: a dynamic range greater than 50 dB; negligible distortion to the output ...

Here's the first of two simple PWM control circuit using inexpensive readily-available components. The circuit component values shown are for a 12V supply but could be altered for other ...

I wouldn't think very many at all? Maybe a small inductor mounted on the PCB and the output to the transducer can loop through that before going off to the transducer? This would be an ...

Inexpensive DC-DC converter/SMPS design idea and suitable topologies MD MUBDIUL HASAN Nov 16, 2021 buck converter dc dc high power

Just wondering what can be used as an inexpensive potting compound. The commercial solutions seem fairly expensive at \$40.00 for 350ml. The small 12V timer...

Just wondering if anyone has tried Jaakko Kairus' PICKITminus project to upgrade the Stand Alone Programming App" for their PICKIT 2 or PICKIT 3 to program many, many, almost all (?) ...

What sources or techniques/methods do you know of for large inexpensive project boxes (aka enclosures) in the USA? (at this point, I would have to venture you gophert, are the one "cry ...

The components are inexpensive, consisting of a P-MOSFET (for use in the positive rail) with a dual PNP

Inexpensive small outdoor power supply

transistor and two resistors. Q1 and Q2 form a current mirror circuit that act as a ...
