---

Our fully automatic automotive battery assembly line consists of multiple stations. General functions include post position check and entry gate control.

Turnkey assembly line systems for prismatic, cylindrical, and pouch battery packs -- engineered for high-throughput, precision and consistency in manufacturing operations.

Next-generation battery management systems maintain optimal operating conditions with 45% less energy consumption, extending battery lifespan to 20+ years. Standardized plug-and-play designs ...

Composed of multiple lead-acid battery modules connected in series or parallel, this system is designed to store electrical energy efficiently and release it when the main power supply fails, making it ...

Specializing in robust, efficient lead-acid battery production equipment--from grid casting to formation lines. Automate workflows, enhance safety, and meet industry standards for automotive, industrial, ...

With our complete assembly solutions for car and truck batteries, we have the expertise to fulfil your needs. Our automotive lead-acid battery production equipment includes enveloping/wrapping & ...

Our assembly line solution is meticulously tailored to meet specific requirements, accommodating variations in battery type, range, and desired output. Experience a production process that is not only ...

Leko is fully owned and operated by The Infinite Industries Group of Companies. For over 20 years, Leko has been designing, installing, and improving lead acid battery assembly line equipment. ...

Our end-to-end solutions integrate high-precision assembly, advanced BMS integration, and automated testing to ensure every module and pack is built for ...

# Integrated base station lead-acid battery assembly

It can be integrated as a stand-alone production line or as a pre-assembly process in the final assembly of the battery module. It ensures reliable electrical ...
