The Net-Zero Microgrid Program provides cross-cutting research to accelerate the use of renewable and zero-carbon generation in microgrids.

This report delves into the state of the US microgrid market and Wood Mackenzie's outlook through 2029. We are currently tracking 4,870 microgrid projects that are operational, stalled, ...

While DOE has made significant progress in supporting microgrid deployments, there remain research gaps for both remote microgrid, and microgrids for critical infrastructure, which are being addressed ...

This report describes detailed lessons learned, from up-front planning guidance to actionable interconnection recommendations. Based on the experiences with these seven projects, the ...

Data centers, hospitals, industrial facilities, and government/military sites top the list for future growth potential--clear signals that microgrids are moving into mission critical territory.

This report analyzes the microgrid market landscape across 21 states and territories, providing insights into regulatory frameworks, incentive programs, commercial opportunities, and strategic approaches ...

This report summarizes the attributes of the various assets that will be used in Pacific Northwest National Laboratory's (PNNL's) Integrated Renewable Energy System (IRES) microgrid project.

Traditionally reliant on fossil fuels, the construction industry faces increasing pressure to adopt sustainable energy solutions to reduce carbon emissions and achieve Net Zero Carbon ...

This Mini-Grids Partnership Report was produced with funding from UK aid from the UK government via the Transforming Energy Access platform.
