The first auction was held between 2024 and 2025 for a total capacity of 165 MW, of which 105 MW were wind farms and 60 MW were photovoltaic. The second auction will be launched at the end of ...

The tender targets investors developing onshore wind power plants in the Republic of Moldova, with supported capacity of up to 170 MW, coupled ...

Positioned as Moldova's largest battery storage initiative to date, this 55MW/110MWh project addresses critical gaps in regional grid stability while enabling higher solar and wind energy penetration.

Moldova prepares a 170 MW wind and storage tender for 2026, introducing mandatory battery systems and clearer rules for hybrid projects. Learn how Moldova wind and storage tender supports national ...

Authorities in the Republic of Moldova have launched a public tender inviting investors to develop wind farms integrated with energy storage systems. Offers can be submitted between ...

New investments are estimated to reduce greenhouse gas emissions by over 1.4 million tons of CO₂, equivalent to the annual emissions of around 310,000 cars. The tenders are expected to ...

Moldova's ambitious push to transform its energy landscape through renewable auctions, especially the innovative integration of wind power with battery energy storage systems, marks a ...

For the first time, solar and wind output in Moldova collectively met national demand in real time. The Ministry of Energy's monitoring platform recorded the 12:00 achievement, underscoring two wins at ...

Moldova is preparing for its second major renewable energy auction in autumn 2025, this time focusing on onshore wind farms equipped with integrated battery energy storage systems ...

Moldova Wind Solar and Energy Storage Project

The upcoming auction, scheduled for October, will offer contracts for the development of up to 173 MW of onshore wind and a minimum of 44 MWh of ...
