Publishing monthly, Nature Energy is dedicated to exploring all aspects of this on-going discussion, from the generation and storage of energy, ...

An energy-dense hydraulic fluid is used to construct a synthetic circulatory system in a lionfish-like soft robot, enabling untethered movement for up to 36 hours.

Here we present real-world data from 21 privately operated lithium-ion systems in Germany, based on up to 8 years of high-resolution field ...

Multi-day, long-duration energy storage (LDES) is essential for decarbonizing the power grid, yet grid-scale deployment of LDES faces steep ...

Herein we will consider LDES to refer to technologies that are both technically and economically suitable to cycle infrequently and store energy in sufficient amounts to sustain ...

It presents analyses of 21 home storage systems over a period of up to eight years. The main scientific contributions are the development of a scalable capacity estimation method and the ...
