Increase access to electricity: Raise the national electricity access rate from the current 84% to 100%, focusing on rural electrification through the expansion of the grid and/or off-grid mini-grids.

New York Independent System Operator - our mission is to ensure power system reliability and competitive markets for NY in a clean energy future while working ...

"Battery energy storage is essential for grid stability and renewable integration. Securing this project not only validates our EPC capabilities but also sets the stage for a pipeline of additional BESS ...

The archipelago continues to struggle with grid stability amid high fuel costs and overdue maintenance.

Initial estimates indicate that about 10-15 percent of these schools are not connected to the power grid, and this subcomponent will finance electricity access to these schools.

New York Offshore Wind Cable Corridor Constraints Assessment
Brooklyn Clean Energy Hub
New York Offshore Wind Interconnection
NYSERDA is conducting an Offshore Wind Cable Corridor Constraints Assessment to better understand siting offshore wind cables in New York State waters, at landfall, and along overland routes. The Assessment coordinates the analysis and evaluation of potential resource constraints, including natural and environmental, socioeconomic, and infrastru...
