---

We conduct scientific research, modelling and simulations to support the modernisation and decarbonisation of South Africa's energy systems through improved policies and advanced ...

It prioritises exploration, beneficiation at source, research and development, regional integration, financial instruments and energy security, guided by our ...

(SAREM) An inclusive industrial development plan for the renewable energy and storage value chains by 2030 2 April 2025 The Department of Trade, Industry and Competition (the dtic), November 2020 ...

Finding the exact optimal angle to maximise solar PV production throughout the year can be challenging, but with careful consideration of historical solar energy and meteorological data for a ...

The Solar Energy Research Group of the Department of Physics at the University of Pretoria is dedicated to conducting globally competitive, cutting-edge research in the area of thin film photovoltaics.

In this work, a low-cost helically coiled cavity receiver and a novel solar concentrator manufactured from off-the-shelf components are experimentally investigated for steam generation at water...

ATTSolar will build and operate the solar plant and related infrastructure, while UP will benefit from long-term, low-cost renewable energy. ...

Modules finalisation nearing completion The South African Renewable Energy Technology Centre (Saretec) has taken on the custodian role as the national renewable-energy-sector educator and...

Despite the country's ongoing electricity crisis and delays in renewable energy development, limited academic research focuses on IPPs' challenges in developing and integrating ...

# Pretoria solar energy research and development

The purpose of Applied Energy Research, Development & Innovation is to facilitate knowledge creation that can support energy-related ...
