-----

The maritime industry is witnessing a significant shift in cargo composition, with lithium-ion batteries and their applications (EVs, BESS) becoming increasingly prevalent.

When shipped as a cargo consignment, battery-powered tracking devices and data loggers that contain fully regulated lithium cells or batteries are subject to all of the provisions of the DGR, including ...

A lithium-ion battery contains one or more lithium cells that are electrically connected. Like all batteries, lithium battery cells contain a positive electrode, a negative electrode, a separator, and an electrolyte ...

Except for prototype batteries, each lithium cell or battery (small, medium or fully regulated) must be of the type proven to meet the criteria in part III, sub-section 38.3 of the UN Manual of Tests and Criteria.

Understand lithium battery certifications, their mandatory vs optional types, and their role in safety, compliance, and marketability for global trade.

(1) Each package offered for transportation containing lithium cells or batteries, including lithium cells or batteries packed with, or contained in, equipment, must meet all applicable requirements of subpart ...

Our goal is for you to become familiar with the current Lithium Batteries & Cells Shipping Guide by following these simple instructions and for you to use it as an ongoing source for the proper ...

Knowing if your cell or battery is lithium-metal or lithium-ion also allows you to focus on the regulatory requirements and variations that apply to your type of cell or battery.

This document provides generalized guidance on the requirements for proper packaging and hazard communication of shipments of lithium cells and batteries and lithium battery-powered equipment by ...
