Standard solar container models can be manufactured and ready to ship in as little as 4-6 weeks. Customized configurations can take up to 8-10 weeks, with ...

Join us as we take you through the intricate details of transforming a 20-foot standard shipping container into a solar powerhouse capable of energizing an entire town.

Beyond mounting the solar panels on the roof of the container on delivery, NO wiring or assembly is required to have your own storage, living space or workspace ready in just a few hours.

Deployment takes only 3 hours, half the time required by traditional energy systems, which typically take 8-12 hours. In collapsed form, the container needs only 20m² of area, reducing ...

Thinking of adding solar panels to your shipping container? Learn key considerations, how many panels fit on 20ft and 40ft containers, plus tips and ...
