This report addresses the benefits of large-scale solar photovoltaic plants for the local environment and biodiversity, and recommends actions to mitigate potential negative impacts.

The scholarship focuses on helping individuals with volunteer experience enter or expand their role in the solar PV or solar heating industries through ...

Power generation from solar PV increased by a record 320 TWh in 2023, up by 25% on 2022. Solar PV accounted for 5.4% of total global electricity generation, ...

The International Solar Energy Society (ISES) is the world's longest-standing solar organization, with a history dating back to 1954. Since its establishment, ISES has led the worldwide transition to solar ...

Representing and collaborating with our members is what drives our efforts to accelerate the deployment of solar PV in every corner of the world. Join us as a ...

The Solar office supports development of low-cost, high-efficiency photovoltaic (PV) technologies to make solar power more accessible.

Here we provide a global inventory of commercial-, industrial- and utility-scale PV installations (that is, PV generating stations in excess of 10 kilowatts nameplate capacity) by using a...
