Inspired by a vacation in sunny Arizona, McMaster began another company, Glasstech Solar, in 1984, to produce cost-effective solar arrays. His insight was that the essential cost element ...

First Solar uses rigid thin-film modules for its solar panels, and produces CdTe panels using cadmium telluride (CdTe) as a semiconductor. The company was founded in 1990 by inventor Harold ...

Description: Experience the incredible journey of Harold McMaster and the meteoric rise of First Solar, a pioneering company in the renewable energy sector. ...

A few years later, in 1883, Charles Fritts actually produced the first solar cells made from selenium wafers - the reason some historians credit Fritts ...

History: The Glass Roots: Founded by inventor Harold McMaster, the company leveraged his expertise in tempered glass to solve the technical challenges of Cadmium Telluride (CdTe) solar ...

The tempering process that McMaster came up with and patented, involved heating the glass and then rapidly cooling it, leaving it stronger, safer ...

Alan J. McMaster has filed for patents to protect the following inventions. This listing includes patent applications that are pending as well as patents that have already been granted by ...

In the 1990s, McMaster went on to develop a solar cell--a chemically-coated glass that turns sunlight into electricity. For several years, the cell produced by the ...
