Yesterday, 26 May 2021, the City of Vienna presented initiatives to develop solar energy. Starting 1 June, photovoltaic systems on green roofs will be subsidised ...

"Vienna wants to become climate-neutral by 2040. An important lever for this is the solar power offensive. Our target curve is steep: as early as 2025, ...

In order to promote climate protection, we will be investing heavily in expanding the use of renewables such as solar, wind and hydro power as well as electromobility. We are actively shaping the future of ...

Over 1,500 new solar power installations have gone online over the past six months, helping fulfil the needs of 57,500 households in Vienna.

A future-proof energy policy for Vienna requires the development of a sustainable energy system characterised by a high degree of supply security, stable and affordable energy prices, a significantly ...

In addition to mandating solar panels and energy-efficient buildings, Vienna is now heating thousands of homes with geothermal energy instead of planet-heating natural gas. It's ...

Following a historic reduction in greenhouse gases by 12 percent and a 33 percent decrease in domestic energy consumption, the next major breakthrough has now been achieved: Ten months earlier ...

Solar energy technologies and power plants do not produce air pollution or greenhouse gases when operating. Using solar energy can have a positive, indirect effect on the environment when solar ...

Integrated energy solutions that combine passive design, advanced technologies, and local renewable energy systems have proven effective in improving energy efficiency of buildings, ...
