It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for ...

This dataset identifies counties and municipalities that had a solar energy ban or moratorium as of April 2022. A TIF data file and a PNG map of the data are...

Compared to existing datasets, it provides better precision and spatial detail, showing global PV growth of over 60% between 2019 and 2022, with developing countries leading the increase.

The Solar Power Generation Data dataset provides synchronized inverter-level AC/DC power and yield measurements together with plant-level ...

Accurate mapping of photovoltaic (PV) power plants is critical for monitoring the development of solar energy generation and supporting PV operational management, policy-making, ...

Solar power generation and sensor data for two power plants. This data has been gathered at two solar power plants in India over a 34 day period. It has two pairs ...

Inside, you'll see a central table listing each grid's available photovoltaic (PV) datasets. Each grid has its own Markdown file containing detailed information on ...

Our analysis included two results: weather-adj. average performance of solar assets by vintage across the US and weather-adj. average performance of solar assets by operating year by region.

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector.
