The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is for ...

Solar energy projects across the U.S. are scaling up, with major developments in Maine and Massachusetts reshaping the energy landscape.

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well ...

Solar power continues its run as the fastest-growing source of new generation. Developers plan to add 43.4 GW of utility-scale solar in 2026, a 60% increase over the record-setting 27.2 GW ...

Dual-use applications such as agrivoltaics, floating PV, and infrastructure-integrated PV are becoming increasingly relevant, helping balance land use, food ...

Each month, we track projects in development and update our list of the largest planned solar projects expected to come online in the US. As of February 2026, ...

U.S. power plant developers and operators plan to add 86 gigawatts (GW) of new utility-scale electric generating capacity to the U.S. power grid in 2026 in our latest Preliminary Monthly ...

EIA projects that PV's growth in 2023 (27 GWac) and 2024 (36 GWac) will continue in 2025 (39 GWac) and remain at similar levels in 2026 (36 GWac). In 2024, 24 states and territories ...

Comprehensive news & insights into global renewable energy projects, covering key milestones in corporate PPAs, equipment orders, financing, and ...

US solar added 18 GW in early 2025, but Trump policies could slash growth by 55 GW by 2030, raising costs

Solar power generation project progress

and risks, says a new SEIA report.
