The total installed solar power in Brazil was estimated at 53.9 GW at February 2025, which consists of about 21.9% of the country's electricity matrix. In 2023, Brazil was the 6th country in the world in terms of installed solar power capacity (37.4 GW). Brazil expects to have 1.2 million solar power generation systems in the year ...

753 MW solar complex with BRL 3.3 billion investment expands Brazil's renewable capacity and energy security Generates electricity for roughly 850,000 people while creating ...

ENGIE launches Brazil's 895 MW Assú Sol solar complex as curtailment pressures reshape the renewable market. With storage and bitcoin mining under review, the project ...

By January 1, 2026, the country's total large-scale power generation capacity reached 215.9 GW, with renewables accounting for 84.6% of the mix. ANEEL projects a 23.4% ...

Get to know the projects" power generation capacities in MWp or MWAC, annual power output in GWh, state of location and exact location on the map, name of developer, year of connection ...

In Minas Gerais, the Enel Group's Arinos Solar Park is born: a project that is reshaping Brazil's energy landscape, creating jobs and ...

Brazil is expected to add 13.2 GW of solar capacity in 2025, but the market is showing early signs of slowing as new large-scale projects face delays and distributed ...

Discover all statistics and data on Solar photovoltaics in Brazil now on statista !

Brazil isn't just embracing solar energy--it's revolutionizing its potential in the global energy sector. As we count down to the Solar ...

Solar power generation projects in Brazil

The expansion of installed solar capacity, both utility-scale and distributed generation, appears likely to continue, although its future pace is less clear. As of June 30, ...
