FirmoGraphs is tracking more than 100 very large solar projects starting construction in 2023 with a total estimated value of nearly \$40 billion.

McGill University researchers used deep-learning computer vision to analyze 719 solar projects across the Western U.S. The study establishes a new "land-sparing" benchmark, providing ...

In 2014, two plants were tied as largest: Topaz Solar Farm, a PV solar plant at 550 MW AC in central coast area and a second 550-MW plant, the ...

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is for ...

Solar energy additions to the US grid are continuing their charge as the Energy Information Administration (EIA) revised its forecast to show more ...

Subaru of Indiana Automotive has new rooftop solar, and it's producing far more clean electricity than its new factory expansion even needs. ...

Power plant developers and operators plan to add 86 gigawatts (GW) of new utility-scale electric generating capacity to the national grid next year. If achieved, this would mark the highest ...

Qcells' Dalton factory is the largest manufacturing plant of its kind in the Western Hemisphere and the first solar panel factory to be built since the ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of

Solar power plant expansion

capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW of new utility ...
