Located in the Tamega Dam, North of Portugal, the Spanish Iberdrola built a Pumped Storage Plant. It takes excess electricity from the grid, mostly generated by wind and solar power, and uses it to pump ...

Situated in the municipalities of Alenquer and Azambuja, the Cerca Photovoltaic Plant features an installed capacity of 202 MWp and over 310 thousand bifacial solar panels, capable of absorbing ...

The available database includes power plants that have wind, large hydro, small hydro, solar photovoltaic, biogas, biomass, waves and tides as sources and relevant information on existing ...

A Portuguese island that once relied almost exclusively on expensive diesel fuel shipments to keep the lights on now runs entirely on wind and solar ...

These records confirm that Portugal has maintained a sustainable trajectory in the progressive integration of domestic renewable sources, while upholding the fundamental objectives ...

There is one thermal power plant in each of the 9 islands. The 4 largest islands (São Miguel, Terceira, Pico and Faial) have thermal production based in heavy ...

Observatório Fotovoltaico is mapping PV projects across Portugal, with information on installation size, year of commissioning, exploration type, ...

Portugal has recently expanded its solar energy capacity by 625 MW, a push marked by several pioneering projects. Two major initiatives highlight ...
