In this paper, ABAQUS software is used to create a three-dimensional stent model, mesh and give material properties to the photovoltaic stent, and at the same time, the bracket is optimized.

Learn how ureteral stents are removed after kidney stones at home with a string or in-office cystoscopy plus recovery tips and warning signs.

Born out of our experience developing surgical systems across more than 40 countries, our Solar Surgery System has undergone extensive development testing. First in our UK center where the ...
