Friday, 10 November 2023: Eskom unveiled the first of its kind largest Battery Energy Storage System (BESS) project not only in South Africa but in ...

Solar parks and grid-scale batteries are set to deliver significant new capacity to South Africa's grid in 2026. Several major renewable energy projects ...

With South Africa moving toward a more decentralised and decarbonised energy system, battery energy storage systems (BESSes), ...

What is a mobile power station?The MOBIPOWER is the silent solution for your remote power needs at construction job sites, off-grid camps, or other applications. Whereas, diesel generators require with ...

This project aims to decommission one of South Africa's oldest coal-fired power plants and replace it with 220 MW solar PV and wind power, as well as 150 MW battery storage. The funding comprises ...

In an effort to increase penetration of renewable energy and reduce regular blackouts, the government and transmission system operator (TSO) ...

This transformation hinges on robust energy storage solutions, particularly lithium-ion and vanadium flow batteries, which are poised to play a pivotal role in ensuring grid stability and ...

Under a 15-year Power Purchase Agreement (PPA) with Eskom, the Oasis projects will leverage advanced battery storage technology to store ...

Discover how mobile energy storage systems are transforming multiple industries - from renewable energy integration to emergency response. This article explores technical innovations, market trends, ...
