The key drivers of the behind-the-meter energy storage system market include the increasing need for energy reliability, cost savings from peak shaving, and the integration of ...

The incorporation of Saft's Li-ion energy storage systems, together with an energy management system developed by CENER, has allowed it to adapt to a storage ...

Spain installed 339 MWh of storage linked to PV self-consumption in 2025, up 119% year on year, according to APPA Renovables.

Battery Energy Storage Systems (BESS) in both FTM and BTM are being adopted at an accelerated rate due to a number of challenges within the electric market and the utility grid.

Energy storage systems (ESSs) can help make the most of the opportunities and mitigate the potential challenges. Hence, the installed capacity of ESSs is rapidly increasing, both in front-of ...

Currently, the storage available in Spain comes largely from pumped hydrogen and concentrated solar power (CSP) plants, that the Spanish Government intends to replace with large-scale batteries (at ...

A battery energy storage system (BESS) is an electrochemical device that charges or collects energy from the grid or a distrib-uted generation (DG) system and then discharges that energy later to ...

There is a proposed law on energy storage to encourage front-of-the-meter BESS, but Congress has not prioritized its ...

UNEF has conducted a study with its associated companies to obtain, for the second consecutive year, the first record in Spain on behind-the ...

Spanish behind-the-meter energy storage devices

The energy secretary said 40,000 small, customer-side, "behind the meter" (BTM) clean energy systems have been installed in Spain and "there are ...
