A pioneering redox flow battery storage facility is being built at the Technology Center Laufenburg, offering impressive sustainable, safe and fully recyclable technology. It supports the integration of ...

Flexbase Group has begun construction on what could become one of Europe's largest flow battery storage installations, breaking ground on an 800 ...

Flexbase Group has broken ground on an 800 MW/1.6 GWh redox flow battery project in Laufenburg, Switzerland, in what could become one of ...

Swiss developer FlexBase has commenced construction on a cutting-edge technology center in Laufenburg, a scenic town along the Rhine in the canton of Aargau.

FlexBase Group will start construction on a data centre plus 800MW/1,600MWh flow battery in Switzerland imminently, the firm claimed.

Swiss startup Unbound Potential secured over EUR14 million to advance its novel membraneless flow battery, replacing complex ion-exchange membranes with streamlined ...

To mark the start of the construction phase, leaders from Flow Batteries Europe (FBE) and the FlexBase Group met in Laufenburg, Switzerland to solidify cooperation on addressing energy security at the ...

The world's largest flow battery facility is set to begin construction in 2025 in Laufenburg, Switzerland!

At that point, the facility is expected to become not only the world's largest redox flow battery but also one of Europe's most important energy and ...

The Swiss cleantech company has successfully closed a pre-seed financing round of EUR 14.4M, which will accelerate the development of its membrane-free redox flow battery and ...
