Find up-to-date statistics and facts on the solar photovoltaic industry in the United States.

In 2022, the United States saw a significant rise in solar power generation, with 5730 utility-scale solar PV plants and 13 solar thermal plants producing 146 terawatt-hours (TWh) of ...

Solar photovoltaic (PV) systems will play a crucial role in meeting the United States' climate and energy goals. Their affordability, ease of installation, and versatility have made them the fastest ...

LBNL reports that substantial solar and storage capacity have been proposed in most regions of the United States. Over 12,000 large-scale projects representing 1.57 TWac of generator capacity (1.48 ...

Solar continues to dominate new electricity generation capacity added to the grid in the United States, according to the Energy Information ...

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

In the first nine months of 2025, more than three-quarters of the electrical generating capacity added in the United States was solar power, ...

Our nation has abundant solar, water, wind, and geothermal energy resources, and many U.S. companies are developing, manufacturing, and installing cutting edge, high-tech renewable energy ...
