Overview1960-19791800s1900-19291930-19591980-19992000-20192020so 1960 - Hoffman Electronics creates a 14% efficient solar cell.o 1961 - "Solar Energy in the Developing World" conference is held by the United Nations.o 1962 - The Telstar communications satellite is powered by solar cells.

Officials said that this microgrid would generate power from the sun and would store it in batteries for future use, the microgrid will be the first of its kind located at a public school division ...

The development of solar cell technology, or photovoltaic (PV) technology, began during the Industrial Revolution when French physicist ...

Explore the fascinating journey of solar energy from its ancient ...

University of Delaware is credited with creating one of the first solar buildings, "Solar One," in 1973. The construction ran on a combination of solar thermal ...

In 1839, Becquerel was the first person to discover the photovoltaic effect, the phenomenon where sunlight is converted into electricity. This ...

As early as 212 BC, the Greek scientist, Archimedes, used the reflective properties of bronze shields to focus sunlight and to set fire to wooden ships from the Roman Empire which were besieging Syracuse.

Concentrated solar power and solar thermal energy applications had been in use for a while, but purely photovoltaic solar isn't born until U.S. ...

Shuman built the world's first solar thermal power station in Maadi, Egypt (1912-1913). Shuman's plant used semicircle shaped troughs to power a ...
