The invention relates to a communication base station stand-by power supply system based on an activation-type cell and a wind-solar complementary power supply system.

The wind-solar-diesel hybrid power supply system of the communication base station is composed of a wind turbine, a solar cell module, an integrated controller for hybrid energy ...

Since all the electrical equipment in the meteorological station is AC load, the inverter is the key equipment of off-grid wind-solar complementary power generation system.

The wind-solar-diesel hybrid power supply system of the communication base station is composed of a wind turbine, a solar cell module, an integrated controller for hybrid energy
