This video shows the complete history of the Solar system, and it is inspired by Algol's video ( o History and Future of the Solar System ). However, some important details are...

If the Solar System formed all over again, the Earth might not have its Moon, and Pluto could well have a more normal, near-circular orbit -- these are just two of many of the Solar System's properties that ...

The outer solar system, where Pluto resides, is the new frontier for exploration. Astronomers have been finding other worlds out there, in regions ...

This article traces the history of the discovery of the solar system, highlighting key figures, ideas, and technological breakthroughs that have ...

Our solar system formed about 4.6 billion years ago from a dense cloud of interstellar gas and dust. The cloud collapsed, possibly due to the shockwave of a nearby exploding star, called a ...

Here is the series of events that made and shaped our solar system, to the best of our knowledge, pieced together from space missions, Earth-based ...

Learn the heliocentric model of the Solar System, its history, evidence, mathematics, and differences from the geocentric model.

It is not common for systems to retain this characteristic, indicating that the system has not undergone any major changes throughout its billion-year ...
