The network consists of 85 base stations situated in hospitals and health centres throughout the country and mobile HF communications installed in 11 ambulances.

This training course provides a comprehensive, engineering-focused exploration of green base station engineering tailored for the telecommunications industry. Participants will examine sustainable site ...

Timor-Leste's telecommunications infrastructure is still in the process of development, with a significant portion of the population still relying on mobile phones for internet access.

Timor-Leste telecommunications base station infrastructure

Following Indonesia's withdrawal from Timor-Leste in 1999, the telecommunications infrastructure was destroyed in the ensuing violence, and Telkom Indonesia ceased to provide services. A new country code (670) was allocated to East Timor by the International Telecommunication Union, but international access often remained severely limited.
