---

The Hagersville Energy Storage Project is now fully operational in Ontario. Developed by Boralex, in partnership with Six Nations of the Grand River Development Corporation, it is ...

By 2030, TotalEnergies aims to develop 5 to 7 GW of battery storage capacity, mainly in Europe and the United States. TotalEnergies ...

Solar and battery storage are set to account for 79% of 86 GW of new utility-scale capacity planned in the United States in 2026, marking the largest annual increase in more ...

The following resources provide information on a broad range of storage technologies.

To support the global transition to clean electricity, funding for the development of energy storage projects is required. Pumped hydro, ...

The second phase of the project was operationalized a year ago which brought its total energy storage capacity of the project to 530 MW / 2120 MWh, bringing it among the 5 ...

Australia announced plans for the world's largest pumped storage plant in Queensland, with 5 GW capacity.

Nevada deployed 1.4 additional gigawatt hours of battery storage in 2025 with the completion of Primergy's Gemini Solar project, increasing the state's total battery capacity to ...

Within this segment, three solar plants with a total peak capacity of 16.4 MW have already been completed, generating clean energy. KNESS Smart Power, part of the KNESS ...

A new project, Tehuacana Creek 1 Solar and BESS, adding 837 megawatts (MW) in Texas, is the largest solar photovoltaic project expected to come online in 2026; it will also ...
