The Project to Develop and Equip the Power Transmission Grid (PAERTE) aims to strengthen Tunisia's power grid and allow for greater additions of renewable capacity, specifically wind and solar.

The Tunisian Solar Plan (PST) is the national program aiming at reaching the renewable energy development strategy targets. The goal is to increase the total share of renewables in the electricity ...

In June 2023, the World Bank approved US\$268.4 million in financing for the Tunisia-Italy interconnector (ELMED) project that will link ...

Like many countries in the region it has bold plans for renewables with 3,500 mW by 2030 accounting for 30% of power needs. So far only wind has been ...

Off-grid systems are more popular in remote locations, where the added costs of batteries, solar panels, and generators are less than the cost of extending power lines to the main grid.

The objective of this work is to investigate the techno-economic viability of solar PV-Wind-Diesel on-grid and off-grid connected energy system in a location in the north of Tunisia.
